

PROFILE

I'm a detailed doer, creative problem solver, malleable learner, data-driven decision maker, a leader, a relentless advocate, a team player and a curious investigator.

I willingly work for long hours to ensure the success of scopes. As a programmer, I am very patient when handling situations to ensure the decisions made have clear justification. I also acknowledge that I can get better through constructive criticism upon where I have failed or missed. I fear God and believe in integrity above everything else.
